

# “Hating all annuities is like hating all restaurants.”

## *It doesn't make sense to write off all annuities...*

You should be buying annuities for what they WILL DO, not what they might do. Annuities are transfer of risk contractual guarantees that are primarily used to provide:

- P** - Principal Protection
- I** - Income for Life
- L** - Legacy
- L** - Long-Term Confinement Care

**Will Do.**  
**Not Might Do.**

As part of his mission to explain the different types of annuities and help consumers understand which ones might best suit their needs, Stan The Annuity Man has just released his full set of Annuity Owner's Manuals on:

- Fixed Index Annuities
- Income Riders
- Deferred Income/Longevity Annuities
- Multi-Year Guarantee Annuities
- Qualified Longevity Annuity Contracts
- Single Premium Immediate Annuities

These books cut through the misinformation and provide consumers with the tools needed to make an informed decision about an annuity purchase.

This package also includes Stan's first book "The Annuity Stanifesto" which is his original playbook to help explain all things annuity, and is still an Amazon best seller.

To schedule an interview, please contact: **Donna Cox-Davies** – *Media Relations*
